

Marcador Social de Referencias Bibliográficas

Angel Bravo Vinaja

Centro Público de Investigación
Colegio de Postgraduados

abravo@colpos.mx

- CiteUlike es un programa de redes sociales o marcadores sociales gratuito que ayuda a almacenar, organizar, compartir y recomendar los artículos científicos que estás leyendo o que ha publicado una institución.
- Cuando se encuentra un artículo en la web de interés, se puede añadir a la biblioteca personal presionando un botón. CiteULike extrae de la web automáticamente los detalles de la referencia bibliográfica.
- También se pueden importar los registros bibliográficos de una base de datos referencial como SCOPUS o ISI Web of Science en formato RIS o BibTex sobre un tema en particular o las documentos publicados por una institución.

- Richard Cameron desarrolló CiteULike en noviembre de 2004 y en 2006 Oversity Ltd. se estableció para desarrollar y soportar CiteULike, actualmente esta soportada por la empresa Springer Media.
- CiteULike es un sistema abierto a cualquier persona que permite conservar, manejar **y compartir en internet referencias** de documentos científicos y técnicos, que se conservan como propias pero visibles para todos
- Las referencias se **capturan mediante un marcador de favoritos, que se instala fácilmente en el explorador** y extrae los datos bibliográficos que aparecen en una página web. Al incorporarlas, se clasifican en áreas temáticas y les **asigna un término de indización o etiqueta (tag)**.
- Las referencias también se pueden **capturar e integrar desde fuentes aceptadas**, una lista de importantes editores y distribuidores de contenidos, abiertos y comerciales

Como agregar información

- Desde **citeulike**
- Desde fuentes externas como bases de datos de editores o agregadores (Springer, Wiley, Elsevier, Archiv, Amazon, etc.)
- Importando en RIS o BibTex desde bases de datos referenciales o manejadores de referencias.

Añadir informacion de citeulike

- En CiteUlike se ingresa en **Search** se hacen búsquedas de artículos de interés que otros usuarios recomendaron, o sobre otras materias y etiquetas, se ingresa al registro.
- Una vez dentro del documento brinda la posibilidad de copiarlo ya sea en la biblioteca propia o añadirlo (posting) en el Blog del grupo.
- Posteriormente pedirá que se le añadan las etiquetas, configurar los demas datos.

Bases de datos y recursos compatibles con CiteUlike

Individual, country, and journal self-citation in

Budiman Minasny^a, Alfred E. Hartemink^b, Alex McBratney^a

^a Faculty of Agriculture, Food & Natural Resources, The University of Sydney, McMillan
^b ISRIC-World Soil Information, P.O. Box 353, 6700 AJ Wageningen, The Netherlands

Received 11 August 2009; revised 17 November 2009; Accepted 5 December 2009. Available online 1 February 2010.

Abstract

Self-citation is common practice in most sciences but it differs between disciplines, countries and journals. Here we report on self-citation in soil science. We investigated citations in the major soil science journals and conducted an analysis on a country basis and for the subdiscipline of Pedometrics. It was found that the median rate of individual self-citation was 12%, and ranged from 5 to 60% in 31 soil science journals. A high rate of journal self-citation was accompanied by a high impact factor ranking, but ranking based on the Eigenfactor™ revealed a very different ranking compared to the impact factor score ranking. The distribution of country self-citation rate follows a power law, and a logarithmic function was fitted to the data. Taking into account the logarithmic function, China had high rates of self-citations whereas Egypt, Algeria, Ukraine, and Indonesia have low levels of self-citations. With few exceptions, self-citation rates in soil science are reasonable and comparable to the other biophysical sciences.

Post an article from a web page

Just paste the address of an article into the box

Capturar la URL o DOI

URL

This should start with *http://* (though we'll do our best if you forget). You can also enter a DOI (*doi:10.xxxx*), a PubMed ID (*pmid:nnnnnn*), or an ISBN (*isbn:nnnnnn*).

You can post from a vast number of online journals. Paste the URL into the box, and we'll automatically figure out enough details (title, authors, page numbers, etc) to be able to make a proper citation. If your chosen journal is not supported, please contact us and we'll be happy to consider including it.

Fed up copying and pasting?

If you [add a CiteULike button](#) to your browser then you'll be able to post things faster, and without having to copy and paste the URLs into the box above

Añadir manualmente

[Log out](#)

Post to CiteULike

CiteULike can automatically extract the citation details from [certain supported sites](#). If you want to post an article available on one of these sites, you should see the [bookmarklet posting page](#) or, if you're still having trouble, read the [posting FAQ](#). It's quite often possible to find your article on one of these supported sites. For instance, biomedical papers are almost always listed on PubMed.

You may also be seeing this page because you've tried one of the above methods but we weren't able to process the URL.

If you use this page to type the details in yourself, your article will appear in your library as normal, but not on CiteULike's front page.

Research involving women and health in the Medline database, 1965–2005: co-term analysis and visualization

jueves, 28 de julio de 2011 05:18 a.m.

Scientometrics (23 July 2011), pp. 1–28.

This paper shows the main lines of research concerning health and women, as registered in the Medline database, broken down by year from 1965 to 1995 and 1995–2005. The units of analysis used were the Medline MeSH major terms, processed by means of co-term analysis and clustering performed by Pathfinder Networks (PNET), so as to concentrate the displays. Factor analysis was used to group the descriptors and identify the main

Abstract

This work analyses the links between individual research performance and academic rank. A typical bibliometric methodology is used to study the performance of all Italian university researchers active in the hard sciences, for the period 2004–2008. The objective is to characterize the performance of the ranks of full (FPs), associate and assistant professors (APs), along various dimensions, in order to verify the existence of performance differences among the ranks in general and for single disciplines.

Important notes

- If you have a large library, we recommend limiting your selection using a tag. It is likely that your export will be too large to process in the future.
- Exporting large numbers of articles may fail in any case due to limits in the exporting process.

most likely reason is that at least one of your citations is badly formatted. happens and you are sufficiently BibTex/Latex savvy, we suggest downloading the file and removing the extraneous HTML markup, which, even if it doesn't cause a fatal error, can cause problems. Artículos de autores del Colegio de Postgraduados indizados en SCOPUS

La idea de tener este espacio es para dar a conocer los artículos que se publican en el COLPOS, e indizados en SCOPUS. SCOPUS producida por Elsevier, la cual es una base de datos similar al ISI Web de la Ciencia.

No todas los artículos publicados se encuentran en esta base de datos, por cuestiones de indexación de la revista en que se publicaron, pero se pueden añadir estas y de esta forma tener una fotografía más completa de la producción científica del Colegio de Postgraduados.

Se invita a los profesores e investigadores a subir los artículos que no encuentren en la base de datos, exceptuando los preimpresos, ya que estos se publicarán en papel más adelante y pueden tener año diferente.

My Top Recommendations

This is a list of articles we think you might be interested in.

If you see something you like, press the '+' button to copy it into your library. If you're not interested, then 'X' will delete it and it will never show up again.

This list is only updated once every few hours so you might have to wait a while before getting a new set of recommendation. Also, you'll only see anything here once you have at least 20 [articles](#) in your library.

By default we include all articles that are posted to your groups. (See "settings" below.)

[\[Settings\]](#) (click to expand)

Recommendations algorithm

We have implemented several algorithms for recommendations. We suggest you try each of these settings and see which works best for you. It may take up to 24 hours for your settings to be applied and new recommendations generated. Note: changing this setting will delete the current list.

- ☐ **Item-Item Co-Occurrence (IICO)** We look to see how often each article is paired with another in all other users' libraries and choose those which occur most often.
- ☒ **User-Based Collaborative Filter (UBCF)** We find other libraries that are most similar to your and select articles from those other libraries.

Update

Exclude the following groups from your recommendations.

By default we include all articles that are posted to your groups. You can exclude group articles below. Please note that this will only take effect next time your recommendations are generated, which is

Vecinos (marcado de uno o mas artículos iguales)

Abstract

The nutritional carrying capacity for Montezuma quail (*Cyrtonyx montezumae*) was estimated during winter and spring. The biomass availability of bulbs of *Oxalis* in Aculco municipality, Mexico state was measured in transitional zones of pine forested areas and rangelands by quantification of *Oxalis* bulbs (5 cm). Intake was estimated using energy requirements and dietary metabolizable energy, obtaining an intake of 17 g/day of *Oxalis* in adult quail. Dry matter (DM) availability of bulbs of *Oxalis* showed high variation among sites and seasons. Site interaction was not detected ($P>0.05$). There was higher bulb biomass availability during spring (3.02) than in winter (1.29 g DM/m²). Nutritional carrying capacity was 8.14 and 19.06 quails per hectare of habitat, during winter and spring, respectively.

Historia de añadido

citeulike gold

What is CiteULike Gold?

Gold is a set of extra features for CiteULike.

Wasn't CiteULike free?

Yes, and all the features that were free are still free.

Why have you introduced Gold?

CiteULike has been completely free since its creation in 2006, funded mostly from our own pockets and occasional sponsorship (thank you Springer). Recently we added some more advertisements, but we need to be able to fund future developments, hardware, hosting and bandwidth costs, etc.

What do I get for my money?

Below is a list of what you'll get, and we'll expand this over time.

Custom Home Page

With a Gold subscription you can specify which page you prefer to go to when you first launch CiteULike.

You may choose from a preset list or specify any link you like.

PDF Annotations

Annotate your PDFs with notes and other highlights.

[Click here](#) to see an example.

Priority Support

We will prioritize any questions, bugs or feature requests (but make no promises).

Page Views

See how many times other users have viewed your article pages.

Our eternal* gratitude

And we'll give you a golden trophy for your profile page, which you can show off to all your friends, content in the knowledge of your contribution to World Peace and the general well-being of mankind.

(* Well, at least as long as your subscription lasts.)

No more adverts

You won't see any distracting advertisements, with the added benefit of getting back more screen space.

However, if you're one of those people who actually likes adverts, we'll give you the option of turning them back on.

Choose the number articles on each page

On list pages (libraries, search results, etc.) you can customize how many articles you see per page, between 10 and 250.

Citation Formats

You may choose from more than 1,500 extra citation formats.

Publish attachments

You can make your PDFs (and other attachments) visible to everyone you have the rights to do so. Perhaps you want to give your peers a chance to comment on a work-in-progress.

How much does Gold cost?

Yours for the bargain price of £3 per month or £30 per year (2 months free each year).

OK, I'm sold—how do I sign up?

Click [HERE](#). Our payments are taken via PayPal, but you do not need a PayPal account.

La versión Gold de CiteULike ofrece nuevas características:

- *Paginas web preferida
- *PDFs con anotaciones
- ***Soporte**
- *Rastreo de como ven otros usuarios los registros añadidos
- ***Sin Anuncios**
- *Poder decidir el número de artículos por página
- ***Mas de 1500 formatos o estilos bibliográficos**
- *Posibilidad de hacer visibles públicamente los PDFs si se tienen los derechos de hacerlo

Costo: 3 libras por mes o 30 por año

GRACIAS POR SU ATENCIÓN
